

**NiMi** EU Type Approval Certificate 2 Stage Commercially Approved

**SCALE STEEL PLATFORM**

TS8 series truck scale is fully steel platform. It is mounted on the ground and can be climbed onto the scale easily with reinforced concrete ramps. TS8 series are modular type above-ground scales called V-beam system. Twisted steel profiles in V form are used on the platform. V-beams are welded to the top covering sheet continuously. Although the top covering sheet varies according to the weighing capacity, it is approximately 10 mm thick. It is the easiest model to assemble. It can be easily moved to another area at any time.

**SCALE TERMINAL**

The i5 weighing indicator we use in TS8 Truck Scale is a robust and reliable weighing indicator with high precision 24 bit sigma delta ADC, which has stable weighing features with antivibration filtering software. Legally more accurate weighing with two-stage weighing feature. 1/30000 ADC cycle sensitivity, 26 mm high backlit LCD display.

**SCALE PROGRAM**

Using Kobastar Windows based scale program is very simple and easy. It is simple to use for anyone who knows how to use a computer, but with its powerful database, it has data sending and reporting functions in xml, excel, pdf, html, txt formats. It provides remote traceability with the optional web-based database. Light management and license plate reading systems can be easily integrated.

**LOAD CELLS**

Compression type 30 ton capacity OIML R60 C4 certified. With its stainless steel body and IP68 protection, it is extremely resistant to adverse environmental conditions and corrosion. It provides protection from lateral loads with standard mounting kits and prevents false weighing. Optionally, KOBASTAR TSD model digital load cells are also used.

MODEL	SIZES (m)	LOAD CELL COUNT	CAPACITY TON	DIVISION (Kg)
